

Case study on Presentation of data

Do the following operations on 'cars_data' dataset:

1. Read the dataset to the python environment.
2. Check for the null values present in the dataset.
3. Plot a bar graph of male vs female buyers participated in the sales.
4. Find the top 5 cars based on their sales price.
5. Find the least 5 cars based on their Resell price.

Please note the following:

Give heading for each step you are doing.
